• Percentage - 89	

SKILLS

Programming skills: C, C++, Python, Java

Libraries: React.js

Automation: n8n

Frameworks: Node.js, Express.js

Database: MySQL, MongoDB

AREAS OF INTEREST

- DBMS
- Fullstack Development
- UI Design

PROJECTS

ParkEasy

- A web application built using React and MongoDB that allows users to find and reserve parking slots based on real-time availability, reducing parking search time through an interactive booking interface
- <https://github.com/RoshanAfaz/ParkEasy> 

StudentManagementSystem

- A MERN Stack application and mobile app built using React and MongoDB to manage student information through a simple interface. Features include student record management, attendance tracking, adding/editing student details, and organized data storage for easy access and administration.
- <https://achieversacademy.vercel.app> 
- <https://github.com/RoshanAfaz/StudentManagementSystem> 

RequestHub

- RequestHub, a premium web application for streamlining internal organizational requests and approvals. It is built using React and MongoDB, featuring Socket.io for real-time notifications and n8n automation for polished, highly efficient, and professional workflow
- <https://github.com/RoshanAfaz/RequestHub> 

GIS-ChatBot

- SpatialSense, a premium geospatial intelligence platform for advanced spatial analysis and predictive risk forecasting. It is built using React and Flask, featuring Groq AI for natural language querying and Scikit-Learn for a polished, data-driven, and high-fidelity urban analytics workflow.
- <https://github.com/RoshanAfaz/GIS-ChatBot> 

GLOBAL CERTIFICATION

Oracle Apex Cloud Developer | Oracle SE17, Hands on Training Completed -Certification pending

LANGUAGES

English: Fluent • **Urdu:** Fluent • **Arabic:** Basic • **Tamil:** Fluent • **Hindi:** Fluent

PAPERS PRESENTED

Mechnotron 2024, Coimbatore Institute of Tecnology

Mequest 2024, Ramakrishna Engineering College
